- SQLite
- Postgres
- Linux
- AWS
- CI/CD
- Project management
- Product development
- Croatian(Native)
- English
- German

# ŠIMUN STRUKAN

## Senior Software & Mechanical Engineer

## PROFESSIONAL SUMMARY

- **Software developer with 20 years** of experience; founded a startup agency that generated \$4 million in revenue.
- **Core contributor** and community moderator for **LangChainGo**.
- Currently implementing the **memGPT paper in GoLang**, transposing the **LangGraph framework into GoLang**, and working on custom **AI RAG integrations**.
- I can build **RESTful APIs**, **REST API** frameworks, REST clients, and **MVC** frameworks from scratch in multiple languages.
- I can develop **WebSocket servers** and clients, as well as **web and iOS apps**, as a full-stack/software developer.
- I can set up common **CI/CD pipelines** for web and mobile development, as well as **AWS ECS-based infrastructure** with load balancing or other **Linux-based servers**.
- I specialize in **fringe R&D** and tooling development.
- I enjoy working in small, challenging teams. I can work as a **PM and lead teams of 20+ people**. I have experience handling clients and translating **product requirements into project specifications**.
